***Allowable Subject Matter***

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claims 1, 3, 5 and 7 are the inclusion of the following limitations that are not found in the prior art and they are uniquely distinct features. The closest prior art is Traw et al (6,542,610 B2). Traw et al discloses a method of authentication for protecting digital content from copying or other misuse while being transferred between one or more devices over an insecure path. Traw et al. further discloses the exchange of random challenges and deployment of hashing function and an encryption scheme between a source and a sink in order to establish a secure channel. However, this art fails to anticipate or render the following limitations:

"Claim 1: d) sending the identification information from the contents-information receiver apparatus to the contents-information sender apparatus at a time different from a time of the step a)"

"Claim 3: fourth means for receiving the identification information from the contents-information receiver apparatus at a time different from a time of receiving by the first means"

"Claim 5: second means for sending the sending the identification information to the contents-information sender apparatus at a time different from a time of sending by the first means."

"Claim 7: fourth means for sending the identification information to the contents-information sender apparatus at a time different from a time of sending by the first means"

3. The dependent claims 2, 4, 6, and 8-32 are allowed because they were originally found to include a unique feature not found in the closest abovementioned art.
